DETAILED ACTION

Claims 1-70 are pending in this application and subject to restriction.

Claims 1-29 and 36-70 have not been subjected to restriction requirement, as the meanings of the claims are so unclear. First, claims 1-29 and 36-69 are directed to "use of" products, which is not a recognized class of inventions under 35 USC 101. As well claim 70 as well as claims 4, 7, 8, 10, 11, 14, 15, 17, 19, 20, 22-24, 27, 36, 38, 40-44, 46-52, 54, 56, 59-62, 64, 65, 67 and 68 are improper multiple dependent claims that do not refer to the claims in the alternative. As well, they depend from another multiple dependent claim, e.g. claim 68. See MPEP § 608.01(n).

Should applicant amend the claims in their response to the restriction requirement to put them into compliance with 35 USC 101 and MPEP 608/01, they will be treated as newly presented claims and it will be determined at that time if the claims are drawn to the elected invention.

SPECIES

This application contains claims directed to more than one species of the generic invention. Specifically, Claims 30-35 are directed to species of viral genes, E1B-55K, E3ADP, E4orf6 and E4orf3 that are transactivated by the viral oncogene protein.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: each of the genes is structurally and functionally

distinct but furthermore comprises unique transactivation sequences that are structurally and functionally distinct.

Applicant is reminded that upon cancellation of claims to a non-elected inventions, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
